

# Visits by Month cumulative

The **Visits by Month (cumulative)** viewport displays the number of cumulative visits for each month in the selected fiscal year in comparison to the cumulative totals for the previous fiscal year. This viewport is helpful in seeing how the cumulative visit totals match up against the previous year's performance.

You can hover over the bars in the viewport for a total count for the number of visits, or click on the bar to display a list of contact records that make up those results.

## Key Definitions Related to this Viewport:

- **Visits:** The number of contact records, where the contact type is a "Visit", that have been recorded and relate to the selected officer(s) from the beginning of the fiscal year to the end of each month displayed. Your internal contact types have been mapped by your Reeher System administrator to reflect whether it is a Visit, Phone, Letter/Email, Event, or Other.
