

Advancement Layer

The **Advancement Layer** comprehensively summarizes the overall performance of fundraising at your college or university. Users can customize this Layer, choosing from a catalog of viewports, by clicking +Viewport in the upper right corner of the screen. This page has several features to note:

- **Viewport Measurement Toggle** – This feature allows you to change the variable that is being graphed over the same period. A common example is the selection of a Measurement.
- **Fiscal Year** – This feature allows you to change the fiscal year for all Viewports in the tab. You are able to select up to the previous 5 fiscal years.
- **Graph Roll-over Reveal** – This feature will provide you with the actual count within a section of a graph. This roll-over feature will disappear when you are no longer hovering on the section.
- **Chart/Table Toggle** - This feature allows you to toggle the viewport between a chart view and a table view, allowing you to see all the data behind a viewport.
- **Export Viewport** - You can export the viewport as either a PDF for charts and tables, a high resolution image for charts, or an Excel file for the tables.
- **Drill Down Analytics** – When you click on a column section, this feature will display the people who are related to that section. This table is column-sortable and exportable to Excel as a .csv file. In the top right of the results page, there are icons to [add additional columns](#) to your results, view your results using [Cross Tab](#), or view the results on a map of the US in the [Map View](#).

**Data displayed in each of the viewports is drawn from internal and external data sources.*

Please review the following sections for more information on the Tabs and Viewports included in this layer:
