

Version 4.4.5 - September 8, 2017

This list consists of key new features, as well as issues reported by or of interest to customers. It is not an exhaustive list of updates.

New Features and Improvements

1. New groups have been added to Officer Benchmarks for new officers and former officers, allowing schools to get more accurate results for established and active gift officers
2. Social data pulled into a relationship profile via a Clearbit screening can now be removed in the event that the Clearbit data is inaccurate
3. The Contact Report, Task, and Proposal forms in the Platform have been adjusted to better fit within different screen sizes.
4. Reusing the name of a deleted Targeter query is simpler to do
5. When creating a proposal in Activity Center, it's easier to find the correct Project of Interest due to sorting now taking into account campaign interest codes

Bug Fixes

1. Targeter list uploads are now processing as expected, after some outages over the past few days.
2. Users are able again to view the details of a dollars granted or dollars submitted report for proposals
3. The vendor used to power Donor Discovery results has restored access for batch screenings
4. When viewing a list of individuals grouped by household, exporting that list now only shows the primary person in the household, instead of all results
5. Notification emails have been updated to ensure that inactive proposals are no longer included
6. The Monthly Giving Summary reports within Advancement have been updated to make sure data is displayed for all months in the past included in the report
7. An issue where users could only add other subscribers to one type of notification has been resolved; now users can be added to any of the notification types
