

# Version 4.4.6 - September 22, 2017

This list consists of key new features, as well as issues reported by or of interest to customers. It is not an exhaustive list of updates.

## **New Features and Improvements**

1. Targeter Lists can now be shared with specific users within your organization. Click the Edit button next to a list to see the sharing options.
2. Entities can now have more than one email address in their relationship profile
3. Planned contact reports can be saved to your external calendar while creating them

## **Bug Fixes**

1. Officer Benchmarks EVI calculations have been updated
2. The Proposal Status and Proposal Type columns have been restored, after being temporarily blank for certain reports
3. Within Targeter, the Entity Lookup filter again supports searching for multiple entity ID numbers
4. Within a list of entities, household association is displaying as expected
5. The calendar within the Reeher Mobile iOS app no longer displays as blank in specific circumstances
6. The filtering within the Prospect Assignment table in Major Giving has been restored
