

Version 4.5.0 - November 21, 2017

This list consists of key new features, as well as issues reported by or of interest to customers. It is not an exhaustive list of updates.

New Features and Improvements

1. Class Agent has a new interface that make it even easier for volunteers to interact with their prospects. These updates enhance the experience for your volunteers, making it even easier for them to view their prospects and log their activity. The goal of these updates is to provide the volunteers with tools to improve efficiency and user adoption. Schools can opt-in to the new interface via Control Panel.

Bug Fixes

1. The Contacts by MG EVI viewport has been restored.
2. In Targeter, the cumulative filters once again return results when searching for donation amount equal to 0.
3. In the volunteer portal of Class Agent, maiden names are once again displaying for prospects.
