

Version 4.5.1 - December 8, 2017

This list consists of key new features, as well as issues reported by or of interest to customers. It is not an exhaustive list of updates.

New Features and Improvements

1. Improvements have been made to the service that sends emails to platform users, to ensure they receive welcome and reset password emails more quickly.
2. Contact reports have been updated to work more efficiently for schools that have many project of interests to choose from.
3. For Class Agent customers, the bulk upload tool has been improved to better communicate when a prospect can't be assigned to an agent.

Bug Fixes

1. In certain cases, the Relationship Profile wasn't displaying contact or donor information. That information has been restored.
2. Contact Reports created via an email to the platform will no longer fail to be created due to hidden special characters in the message.
3. The Proposal Type Performance viewport within Major Giving > Proposals no longer displays blank rows in certain cases.
