Version 4.5.2 - December 22, 2017

This list consists of key new features, as well as issues reported by or of interest to customers. It is not an exhaustive list of updates.

New Features and Improvements

1. Filters in Console have been updated to work more efficiently for schools that have many project of interests to choose from.
2. Administrator users of the platform now have the ability to clone and delete user profiles.

Bug Fixes

1. Activity Center: the codes displayed for school/unit and project of interest have been standardized to provide more consistency in the data export from the platform.
