

Version 4.5.9 - April 6, 2018

This list consists of key new features, as well as issues reported by or of interest to customers. It is not an exhaustive list of updates.

New Features and Improvements

1. Tasks created in Activity Center have been improved to be more straightforward, no longer requiring an acceptance to move through the workflow.
2. Attachments can now be added to Tasks in Activity Center

Bug Fixes/Maintenance

1. Creating a new Contact Report in Activity Center consistently shows more results when searching for an entity.
2. The option to enable Today's Items Only has been restored for the Activity Center section of the drawer.
3. The Class Agent manager view has been updated to allow all agents to show with very large campaigns.
4. The end-user license agreement for the platform was updated
