

Version 4.6.4 - June 15, 2018

This list consists of key new features, as well as issues reported by or of interest to customers. It is not an exhaustive list of updates.

New Features/Improvements

1. A new email notification has been added for gift officers, providing a monthly status of their currently defined goals. That notification can be managed via the My Notifications menu.
2. The viewports within Campaign Reporting have been adjusted to take into account the dates defined for the campaign.

Bug Fixes/Maintenance

1. Searching for an entity from the Targeter search bar has been updated so deceased entities display in the results.
2. Targeter queries have been updated so that the counts displayed are more accurate when using location based filters.
3. In Control Panel, the code mapping tool for measured contacts has been improved to ensure it maps contact reports more consistently.
