

Relationship Type

The **Relationship Type** mapping allows you to change the way your institution's relationship types are categorized for reporting purposes in the Platform. You can map each relationship type to one of the following options:

- Alumni, Graduate
- Alumni, Honorary
- Alumni, Non-degreed
- Alumni, Other
- Alumni, Undergraduate
- Board Member / Trustee, Current
- Board Member / Trustee, Other
- Board Member / Trustee, Past
- Corporation
- Donor-Advised Fund / Private Foundation
- Estate / Trust
- Faculty, Current
- Faculty, Other
- Faculty, Past
- Foundation
- Friend
- Governmental Organization
- Other, Non-Person
- Other, Person
- Organization
- Parent, Current
- Parent, Other
- Parent, Past
- Spouse
- Staff, Current
- Staff, Past
- Staff, Other
- Student, Current

Changes made to the relationship type mapping will be reflected immediately in the Platform.

The Edit Relationship Type Mapping table shows all of the codes you have defined, even if the codes are not in use (these will have 0 records). The table also shows all codes that are in use, even if a code definition was not found (Your Description will show "No Description Found").

Please note we may have built custom logic around your data if this was requested or necessary for implementing your data feed. If so, the codes and descriptions shown here may not match exactly what is in your system. Please contact [Support](#) with any questions about the information presented here.
