Version 4.6.5 - June 29, 2018

This list consists of key new features, as well as issues reported by or of interest to customers. It is not an exhaustive list of updates.

New Features/Improvements

1. A new viewport has been added to the Campaign Reporting dashboard that displays gifts grouped by campaign project.
2. Activating a campaign on the Campaign Reporting dashboard no longer requires the selection of a campaign project code.
3. Within Control Panel, Activity Center customers will see a new page under Manage Users that shows how many Activity Center seats have been assigned and to which users.
4. On the Relationship Profile, a new field has been added that displays Outstanding Pledge Amount.

Bug Fixes/Maintenance

1. Proposals originally created in Activity Center have been updated so that when they are moved to a declined status, they will display more accurately in viewports that report on that status.
2. On the Prospect Assignments dashboard within Major Giving, the Prospect Stage column has been updated to display more accurately.
3. Viewing Targeter results or drilldowns in crosstab view more accurately displays results when using Assigned Gift Officers as a filter.
