

Version 4.6.7 - July 27, 2018

This list consists of key new features, as well as issues reported by or of interest to customers. It is not an exhaustive list of updates.

New Features/Improvements

1. Within Control Panel, the Manage Seats page allows you to remove seats from users, for Activity Center and Donor Discovery customers.
2. The contractual limit on the number of active platform users has been added to the Manage Users section.
3. On the Relationship Profile, the related entities section will display nicknames in the entity names if present.

Bug Fixes/Maintenance

1. In Officer Goals, the results for previous years' goals have been adjusted to more accurately include proposals in the correct year.
2. Class Agent managers are able to send reset password emails to agent accounts again.
3. When creating or editing a task, the list of available task owners has been updated to show all active Activity Center seat holders.
