Version 4.6.9 - August 23, 2018

This list consists of key new features, as well as issues reported by or of interest to customers. It is not an exhaustive list of updates.

New Features/Improvements

1. The login page for the platform has a new look and feel.
2. The Relationship Profile has been updated to handle partial social media matches from Clearbit more clearly.
3. For Talent Management customers, the Manage Seats page in Control Panel now allows you to assign and remove Talent Manager seats.

Bug Fixes/Maintenance

1. In Major Giving > Prospect Assignments, entities in a household that are assigned to separate officers will still display when enabling the householding display toggle.
2. In Class Agent, the results totals have been updated to use legal amount on all transactions, to provide a more accurate reflection of a campaign's total.
3. In Console, the Goals by Officer viewport no longer mixes up goal values between goals when an officer has more than one goal of a particular type.
