

Project Goal Progress

The **Project Goal Progress** viewport provides insight into the overall status of one or multiple Campaign Projects. It displays the name of the project, the overall count of donors to the project, the total dollar amount raised, the defined goal of the project, and the progress made to date against that goal.

The Donors, Gift Total, and Completion % totals will update based on the selections made in the Measurement and Date Range page filters.

For example: a project may have raised 80% of its goal, but if you change the date range to be only the last week, the completion percentage would drop to reflect only the gifts received in that time period.

Project Name	Donors	Gift Total	Goal	Completion %
4-H Youth Leadership Program	1,215	\$482,631.40	\$500,000.00	97%

Key Definitions:

- **Project Name** - This is the name of the Campaign Projects you currently have selected.
- **Donors** - The total number of entities who have donated to this campaign project, based on the measurement and date range selected.
- **Gift Total** - Shows the total dollars raised for the campaign project, based on the measurement and date range selected.
- **Goal** - The dollar amount goal defined for each particular project. System Administrators can give users access to edit those goal values from the Project Reporting dashboard.
- **Completion** - The percentage of gift total against the total goal.
