

# Version 4.8.3 - March 22, 2019

This list consists of key new features, as well as issues reported by or of interest to customers. It is not an exhaustive list of updates.

## **New Features/Improvements**

1. Donor Discovery has been updated to provide more consistent data between running a batch screening and a single screening.
2. A Help and Training link has been added to the footer.

## **Bug Fixes/Maintenance**

1. An issue impacting some emails sent by the platform, where the URLs in the message would take users to an error page has been resolved. The solution works for both previous messages with this problem and any new messages sent.
