

Version 4.8.8 - May 31, 2019

This list consists of key new features, as well as issues reported by or of interest to customers. It is not an exhaustive list of updates.

Improvements

1. Net worth values for each entity have been updated, with a new maximum value of \$9,999,999+.
2. Prospect Stages can now be mapped as "Disqualified" or "Permanent Stewardship" in the code mapping menu in Control Panel.
Viewports that display prospect stage will also display those new options, after stages have been mapped to them.

Bug Fixes/Maintenance

1. The FPM mobile app has been updated so it no longer shows incorrect addresses on some entities' relationship profiles.
2. An issue that prevented the option to run a donor discovery screening from displaying has been resolved.
3. For clients that use Advance, the display of grouped prospects on Major Giving > Prospect Assignments and in the Prospects viewport in Console has been improved to ensure entities are grouped into prospects correctly.
