

# Week of September 23 - September 27, 2019

This list consists of key new features, as well as issues reported by or of interest to customers. It is not an exhaustive list of updates.

## **Bug Fixes/Maintenance**

1. Saving an edit to a proposal was erroneously causing the updated date on that record to change to today's date. That issue has been addressed.
2. An issue that caused certain officer goals in Console to display an error page when viewing the drilldown has been resolved.
3. For clients on Advance, choosing a related proposal from a contact report in Activity Center has been updated to also show completed proposals.
