

September 2021

The release notes reflected below are from the past several releases. Beginning in September 2021, monthly release notes will be available covering the key updates over the past month. This list consists of key new features, as well as issues reported by or of interest to customers. It is not an exhaustive list of updates.

Bug Fixes/Maintenance

- Improvements have been made to speed up the performance of Targeter - query times for filters with gift information in the past five years has been shortened.
- When drilling into proposal viewports, several columns related to proposals were missing hover over help text. This help text has been added for better understanding of the columns being added to these drilldowns.

- Activities Management results have been improved and results will now fully load for clients that were not receiving full result sets.
 - To navigate to Activities Management, follow these steps:
 - Console
 - Contact Reports
 - Gear Icon > Activities Management
