

October 2022

The release notes reflected below are from the most recent releases of Fundraiser Performance Management. This list consists of key new features, as well as issues reported by or of interest to customers. It is not an exhaustive list of updates.

Since the [last release](#), the majority of the work has been focused on high urgency bug fixes and behind-the-scenes improvements, including work towards the upgrade to SKY UX user interface. For more details, [see our announcement](#).

New Features

- When you add or edit profiles under **Control Panel, Manager Users**, for Relationship Profile you can now toggle to show or hide the **Timeline**. This further enables you to customize what your users can see and do. Shout out to **Phillips Exeter** for helping champion this feature!
- Work has begun to upgrade the user interface you see when you log in. This update will be rolled out slowly. To start, we updated the Report Library under the Advancement menu.

Bug fixes and maintenance

In addition to general maintenance and specific customer bugs, security work was also addressed.

- We resolved an issue where the Assigned Gift Officer information that is displayed in Fundraiser Performance Management does not match the data being sent in from customer data files.
- We resolved an issue where pasting in copied text into a Proposal's **Comments/Notes** field caused an error.
- In Advancement and Annual Giving, we resolved an issue for Operating Reports. Under **Overall Performance Summary**, users were receiving an error when they selected the **Retained Donors** link for any fiscal year.
